

Tomcat and eclipse configuration

Amirtha

Goto <https://tomcat.apache.org/> and download Tomcat 9.0.37 Released/any version of your choice

The screenshot shows the Apache Tomcat website in a web browser. The browser's address bar displays 'tomcat.apache.org'. The website has a sidebar on the left with navigation links: Tomcat 9, Tomcat 8, Tomcat 7, Tomcat Connectors, Tomcat Native, Taglibs, Archives, Documentation, Tomcat 10.0 (alpha), Tomcat 9.0, Tomcat 8.5, Tomcat 7.0, Tomcat Connectors, Tomcat Native, Wiki, Migration Guide, Presentations, Problems?, Security Reports, Find help, FAQ, Mailing Lists, Bug Database, IRC, Get Involved, Overview, Source code, Buildbot, and Translations. The main content area features three release announcements. The first announcement is for 'Tomcat 7.0.105 Released' dated '2020-07-07', stating that the release contains bug fixes and improvements compared to version 7.0.104, and lists a new environment variable 'CATALINA_OUT_CMD'. The second announcement is for 'Tomcat 9.0.37 Released' dated '2020-07-05', stating that the release includes notable changes compared to 9.0.36, such as TLS environment variables, OSGi manifests, memory footprint reduction, and RFC 2109 cookies. The third announcement is for 'Tomcat 8.5.57 Released' dated '2020-07-05', stating that the release replaces 8.0.x and includes new features pulled forward from 9.0.x. Each announcement includes a 'Download' link. The Windows taskbar at the bottom shows the time as 21:36 on 11-08-2020.

Tomcat 7.0.105 Released 2020-07-07

The Apache Tomcat Project is proud to announce the release of version 7.0.105 of Apache Tomcat. This release contains a number of bug fixes and improvements compared to version 7.0.104.

- Add support for the CATALINA_OUT_CMD environment variable that defines a command to which captured stdout and stderr will be redirected. For use with, for example, rotatelog. Patch provided by Harald Dunkel.

Full details of these changes, and all the other changes, are available in the [Tomcat 7 changelog](#).

Note: End of life date for Apache Tomcat 7.0.x is announced. [Read more...](#)

Tomcat 9.0.37 Released 2020-07-05

The Apache Tomcat Project is proud to announce the release of version 9.0.37 of Apache Tomcat. The notable changes compared to 9.0.36 include:

- Implement a significant portion of the TLS environment variables for the rewrite valve.
- Improvements to the creation of OSGi manifests.
- Reduce the memory footprint of closed HTTP/2 streams
- Improve parsing of RFC 2109 cookies

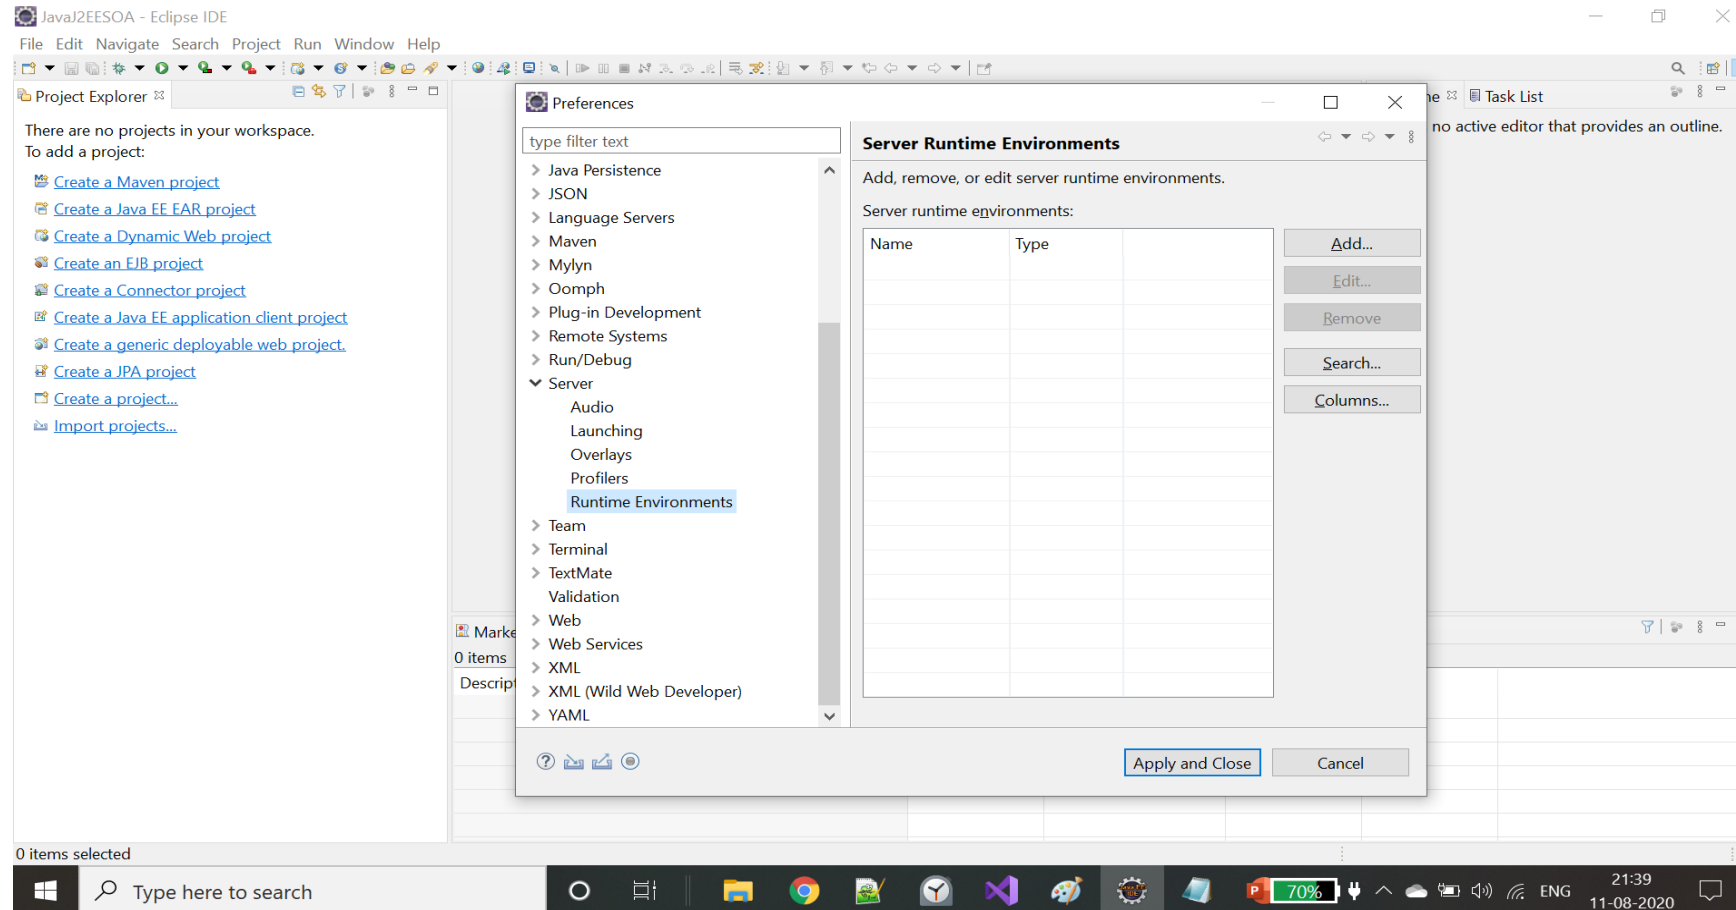

Full details of these changes, and all the other changes, are available in the [Tomcat 9 changelog](#).

Tomcat 8.5.57 Released 2020-07-05

The Apache Tomcat Project is proud to announce the release of version 8.5.57 of Apache Tomcat. Apache Tomcat 8.5.x replaces 8.0.x and includes new features pulled forward from Tomcat 9.0.x. The minimum Java version and implemented specification versions remain unchanged. The notable changes compared to 8.5.56 include:

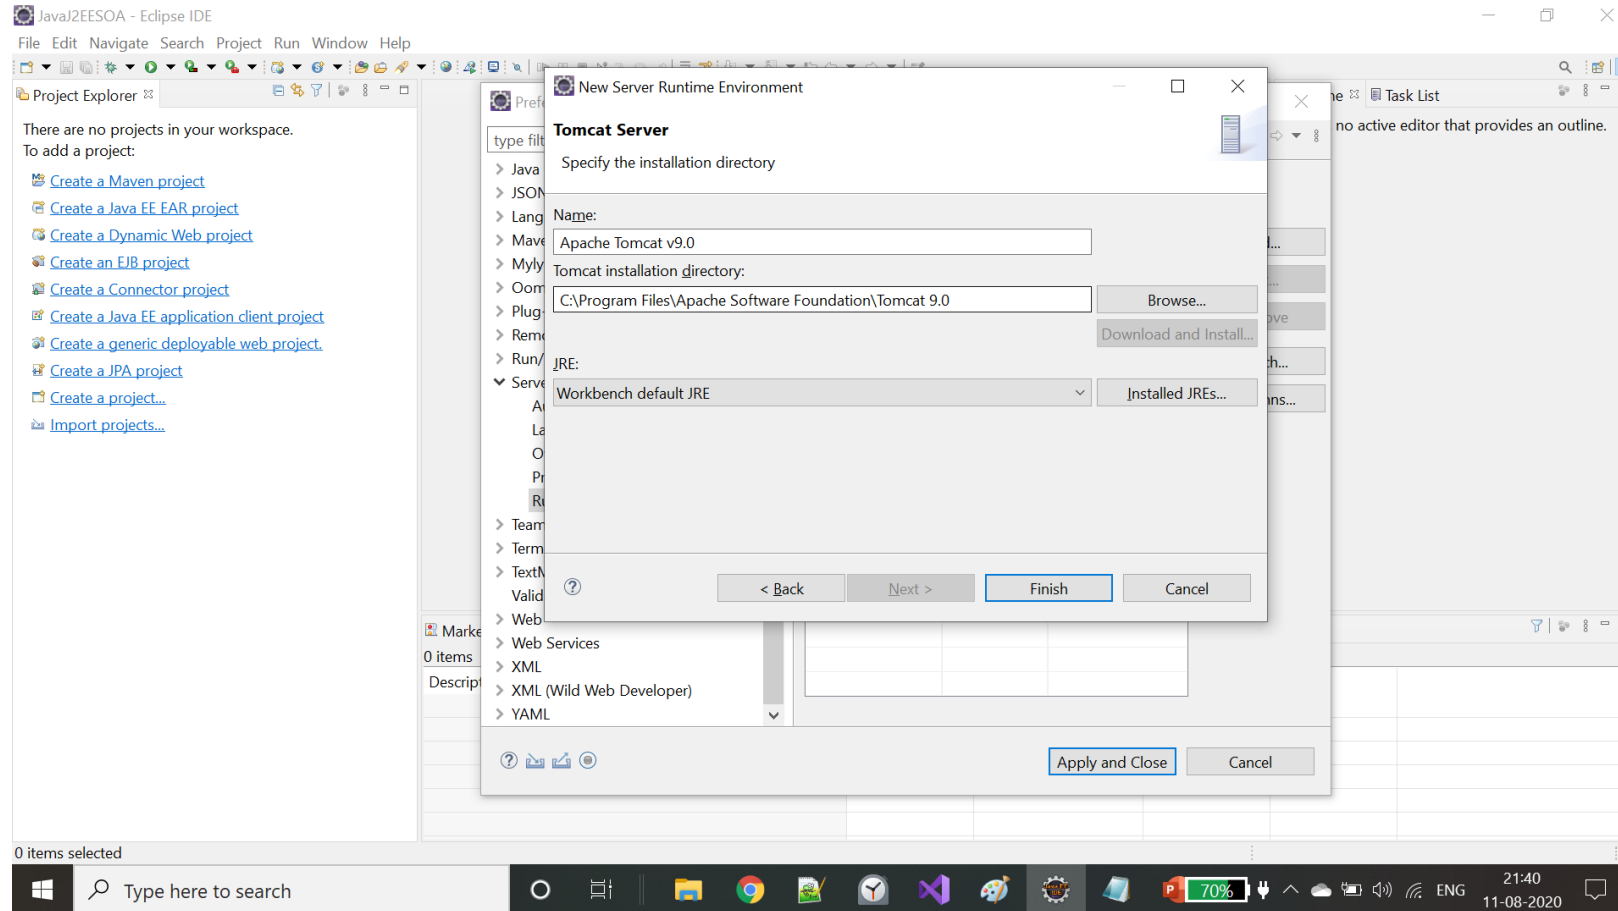

Run apache-tomcat-9.0.37.exe and got to eclipse -
> window -> Preferences -> Server -> Run time
Environments

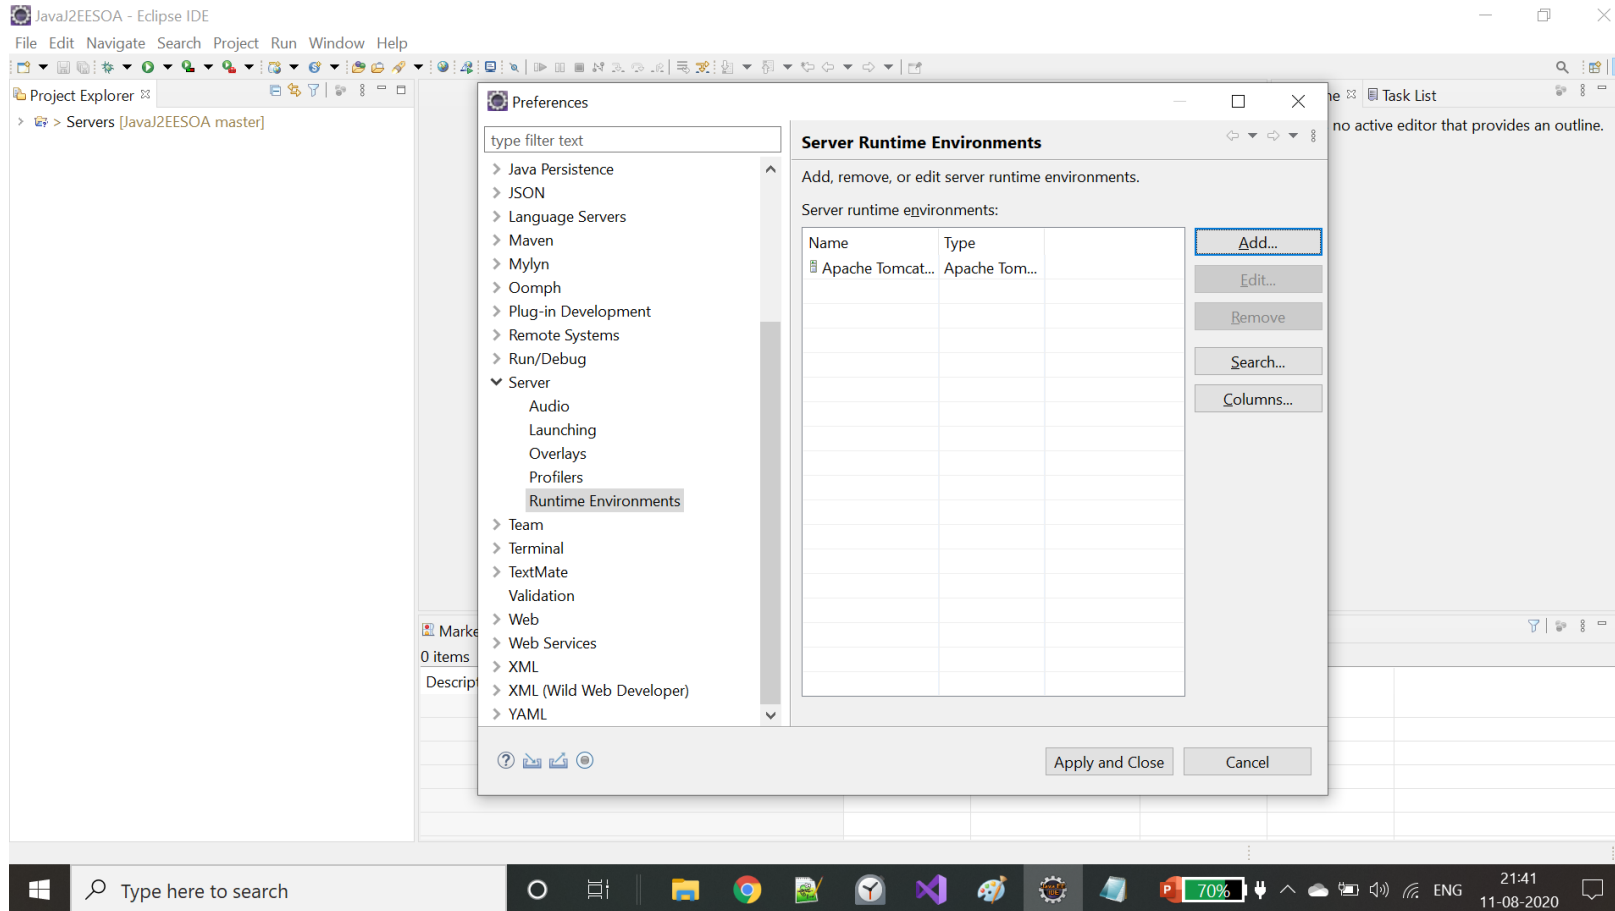

Click on **Add** on the right side and select the installed tomcat version and click next

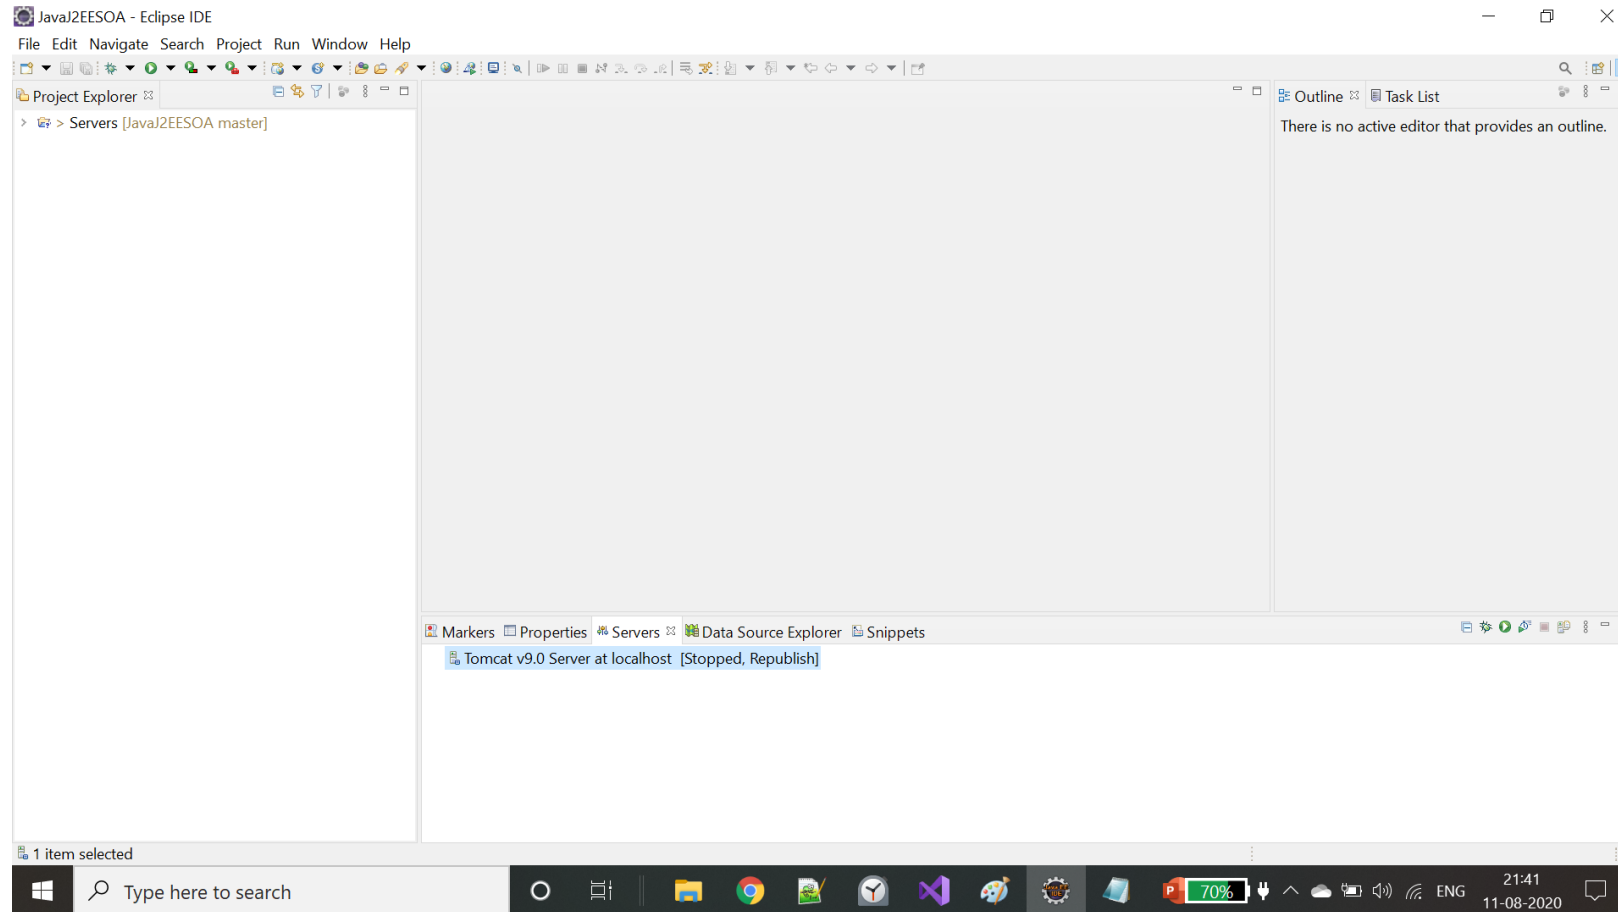

Browse your tomcat directory and click finish

Click **Apply** and close

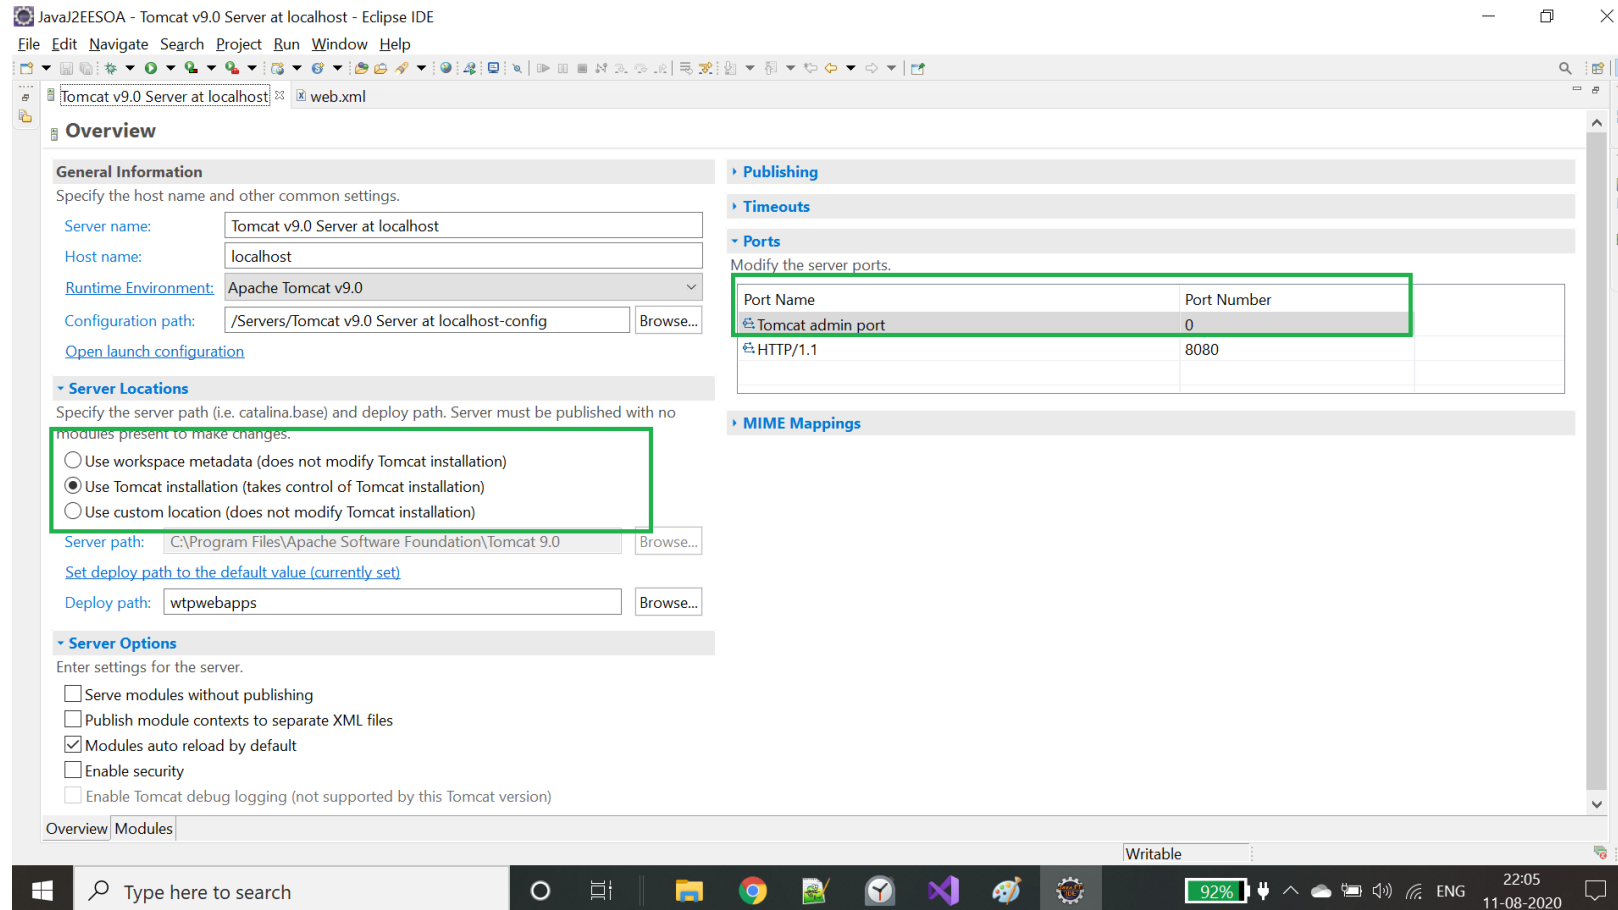

You can locate tomcat server under **Servers** tab

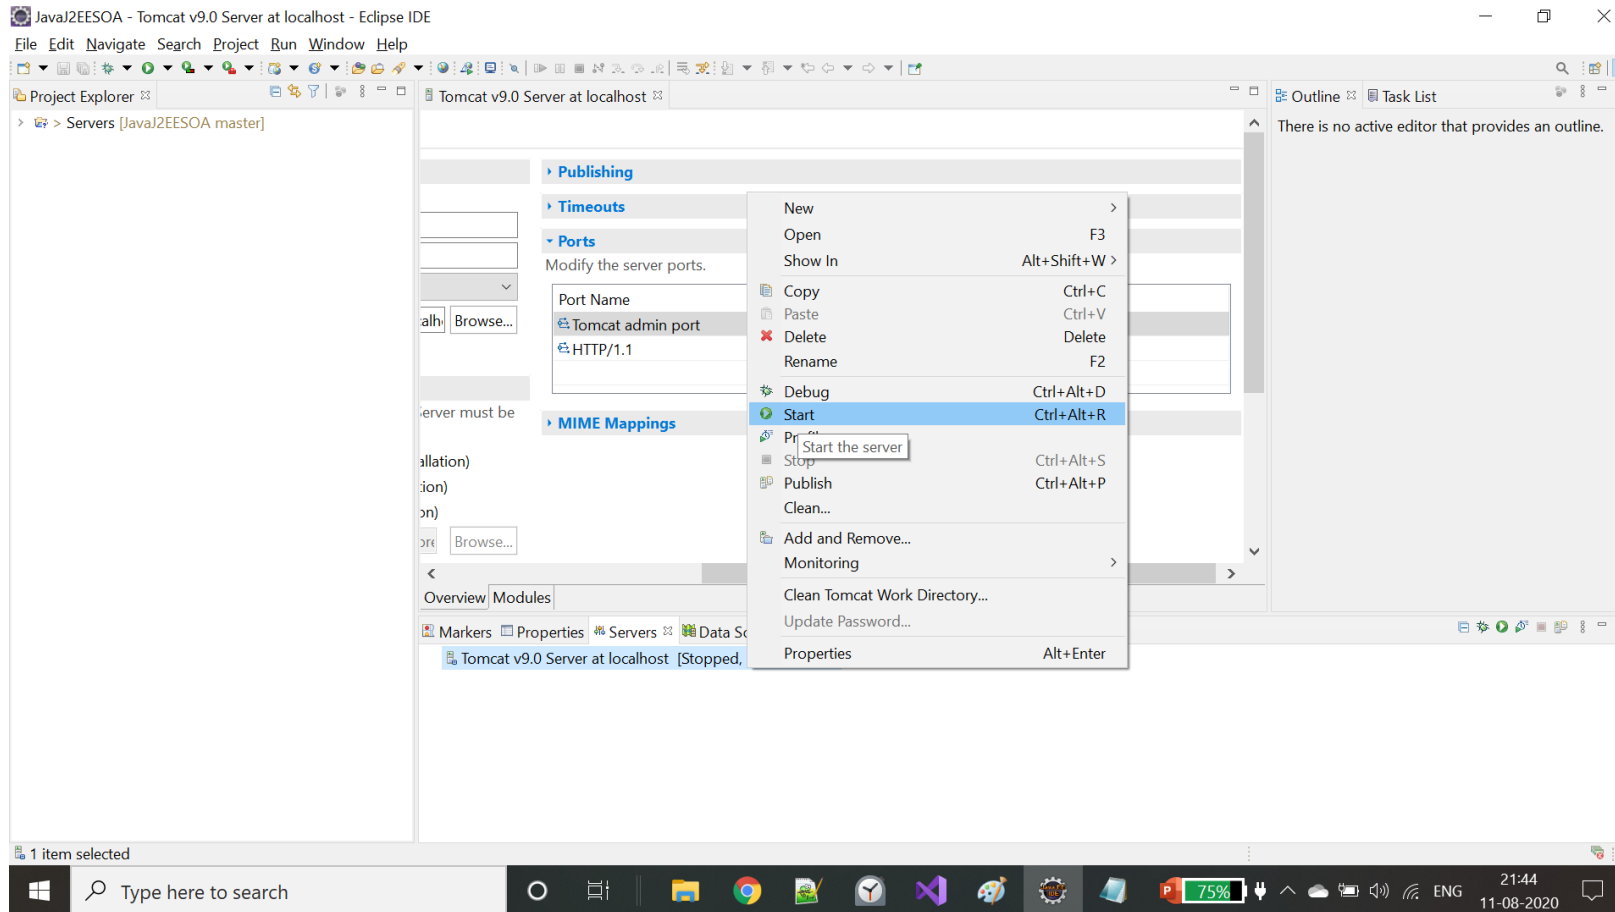

Double click on tomcat server

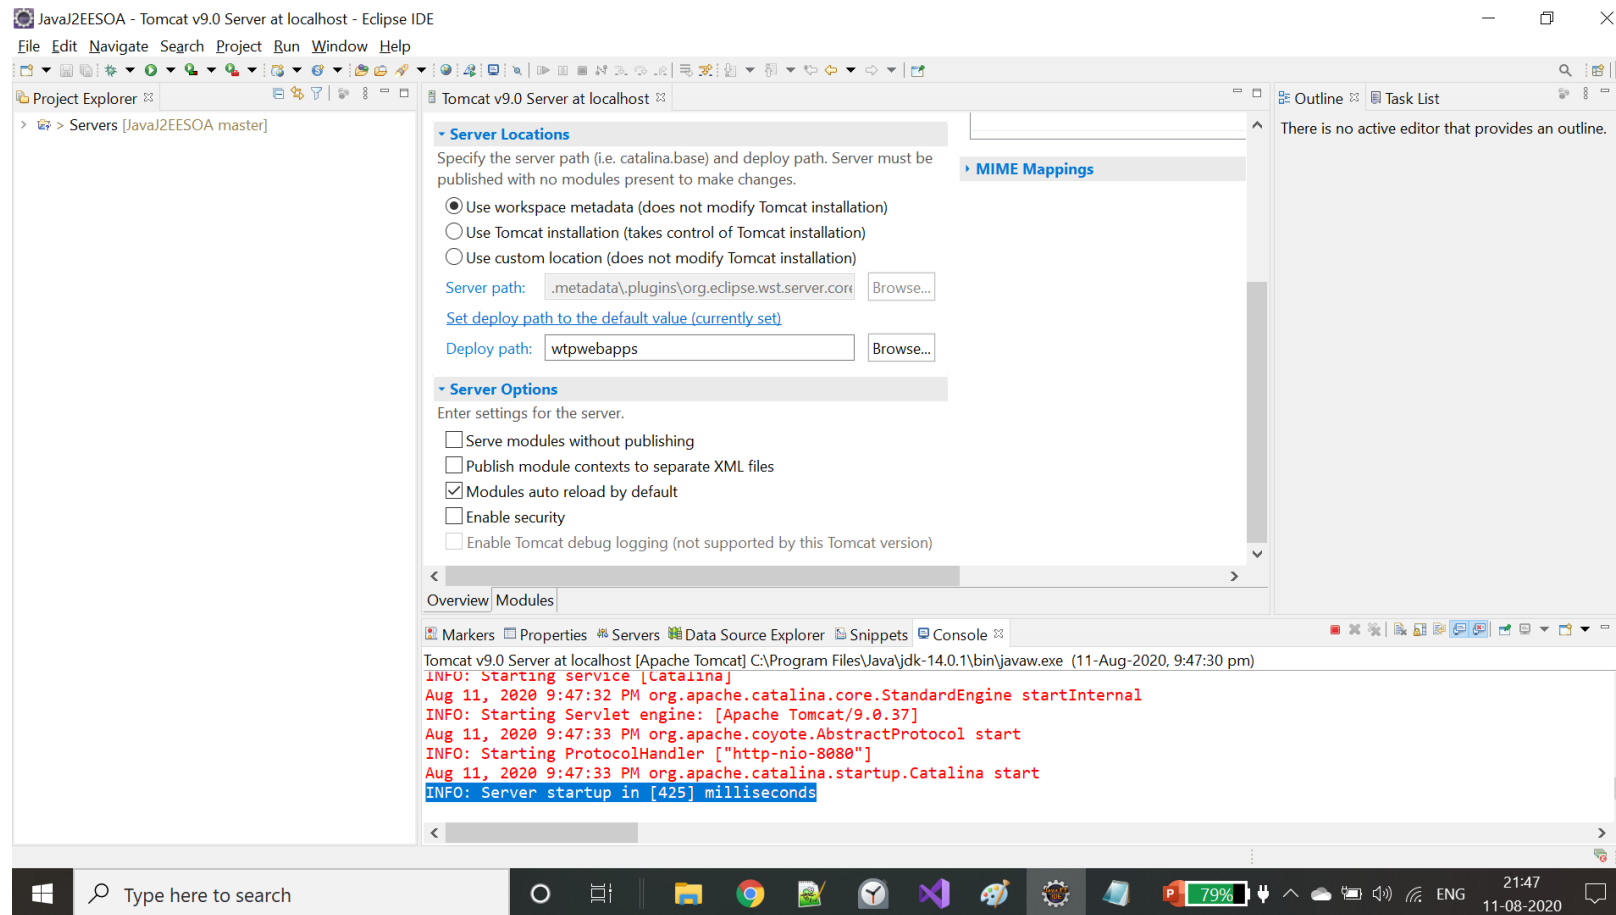

1. Choose use tomcat installation under **server locations**
2. Enter a **Tomcat admin port number** under Ports tab

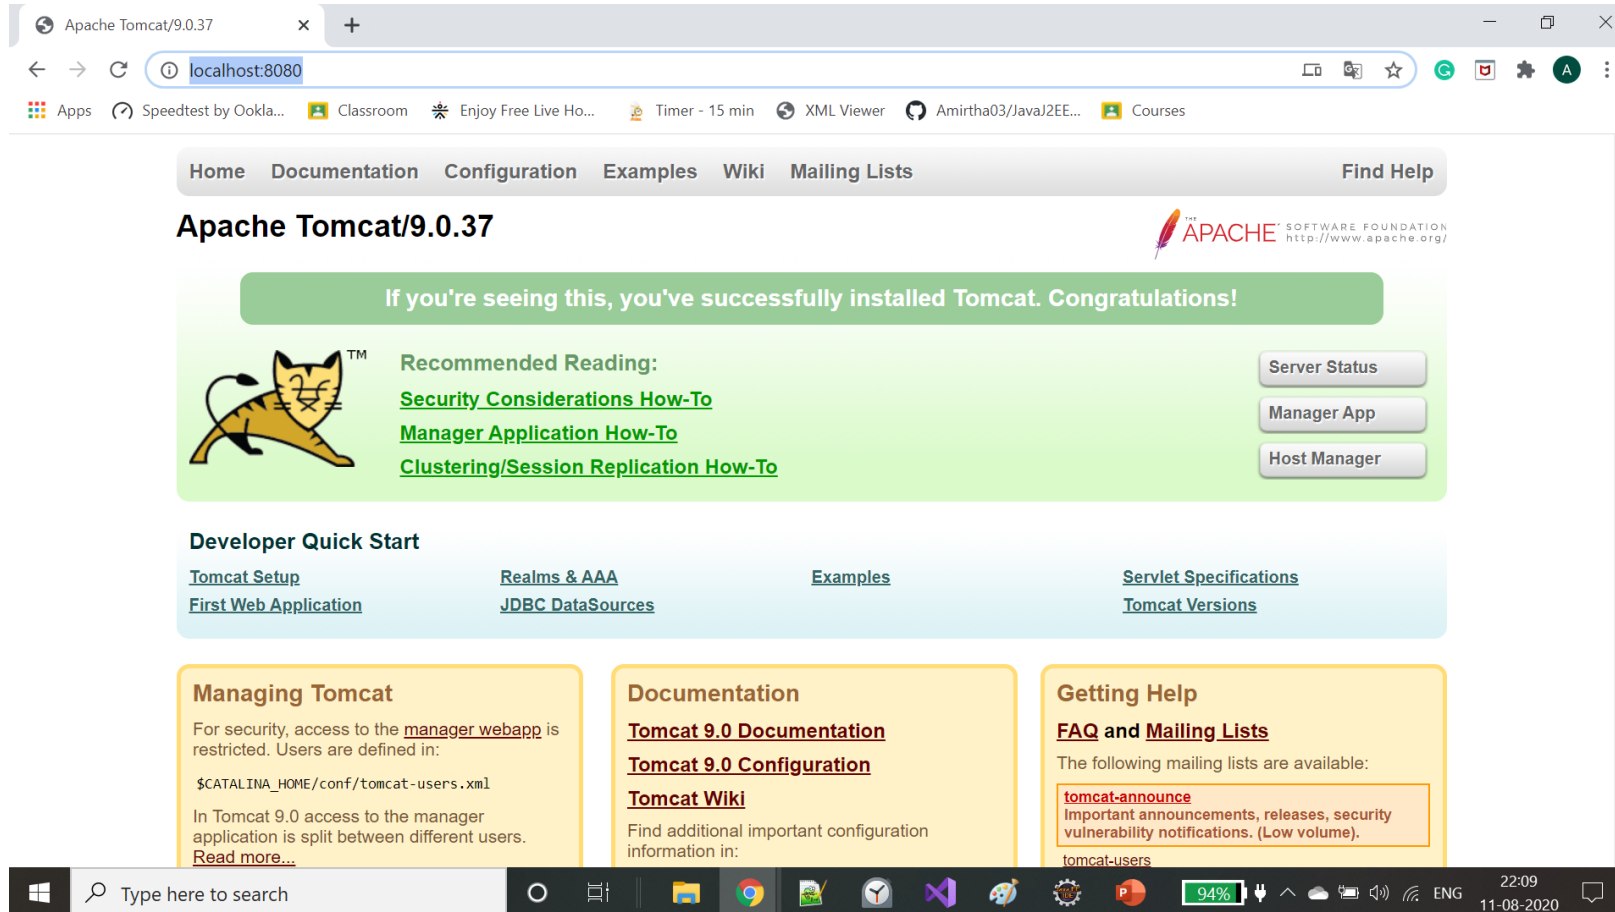

Right click on tomcat server and click **start**

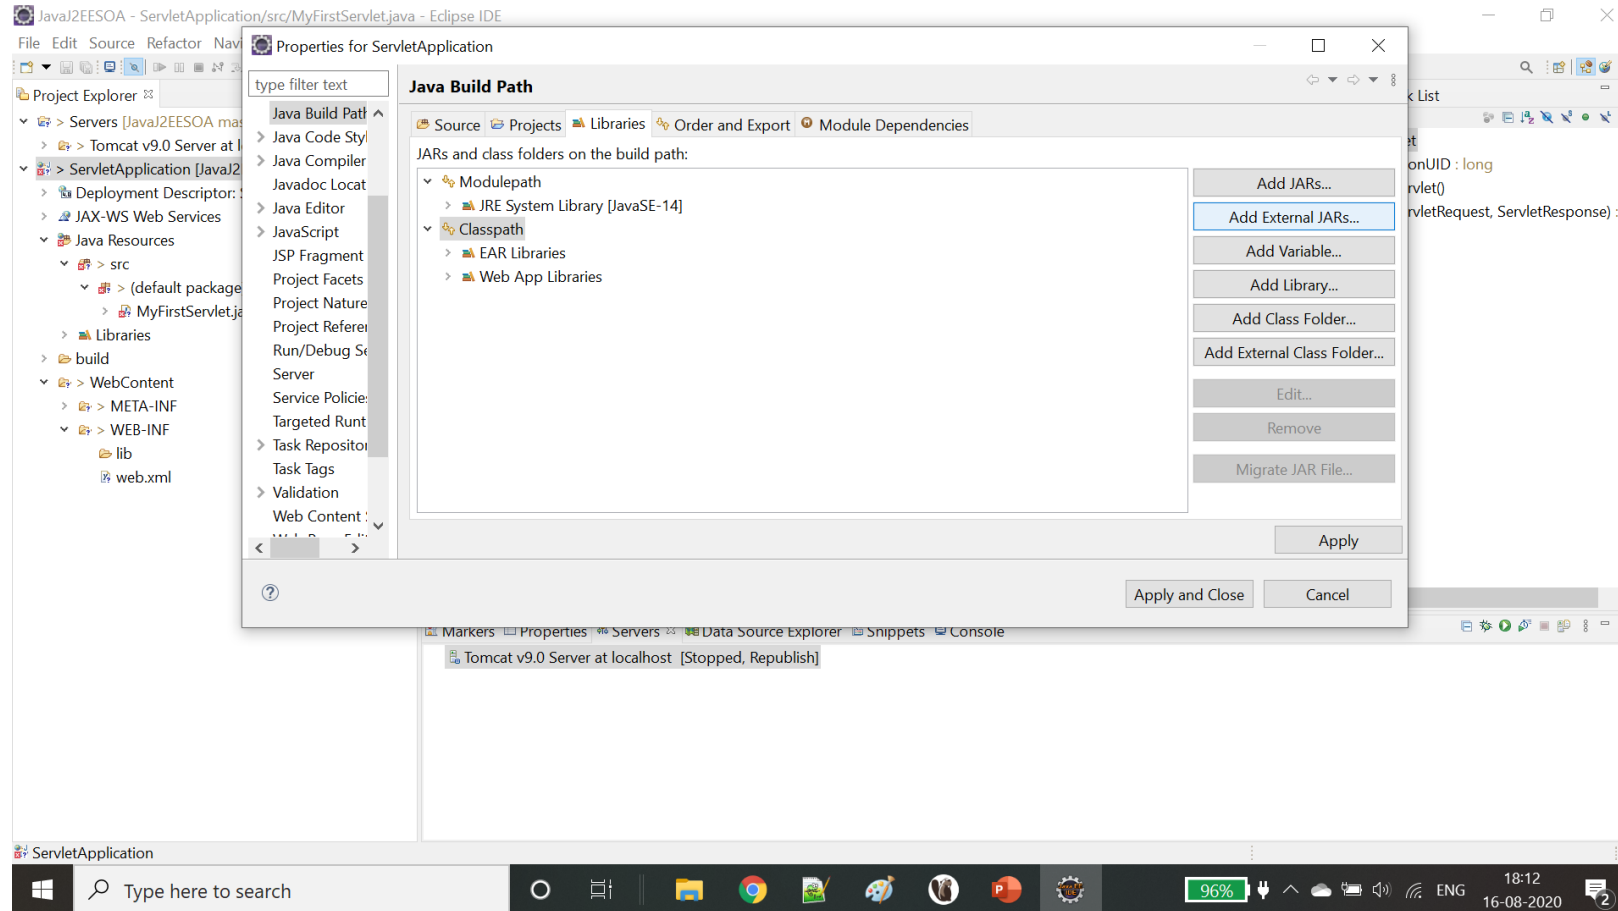

Click start again and click save on the dialog box.
Check the console now for the highlighted message.

Access <http://localhost:8080/> on any browser for validation. Done 😊

Add servlet api in build path -> right click on project -> build path -> configure build path -> Add external jars

Servlet jar can be located inside C:\Program Files\Apache Software Foundation\Tomcat 9.0\lib
